Textbooks needed for Single Maths at A-Level

Dear Families

For the upcoming year, your child will need to purchase maths textbooks – details and prices can be found below. These textbooks need to be purchased as soon as possible, so that we can issue students with them. Students will then be entitled to an online copy of each textbook, but by law they cannot have this without first buying the textbooks.

If you would like to purchase textbooks from the school, payments will be made through the My Child at School app. Of course, you may be able to get a copy yourself from other sources, but this may not come with the online copy. Each student must bring a hardcopy of each textbook to lessons.

Initially you will need two books for each course.

Pure Year 1	Cost: £28.50
Applied Year 1 (Stats and Mechanics)	Cost: £14.50

Using My Child at School you will need to make one payment for these two books of £43.

The books for Year 13 (Year 2) are actually starting around Easter of Year 12 and we will write to you about those at that point. Some students will also need a new calculator for A level maths, but again we will give you that information in a short while.

Please note that if your child is entitled to a bursary, we will reimburse you the full cost of any payments made to date.

If you have any queries on this or anything else regarding your child's mathematics, please do not hesitate to contact us by e-mail ahatton@sackvilleschool.org.uk

Yours sincerely
